WORK EXPERIENCE

AMNIL Technologies

Manbhawan, Lalitpur

Associate Software Developer

Jan 2024 - Present

- Working as an Associate Software Developer, contributing to software development projects using .NET technologies.
- Developed and optimized over 15 core modules using .NET frameworks, resulting in a 20% reduction in system response times and enhancing application performance for end-users.
- Collaborated with cross-functional teams to integrate new features into existing platforms, increasing functionality coverage by 30% and supporting scalable deployment across multiple client environments.

.NET Intern

May 2023 - Aug 2023

- Worked as a .NET Intern, gaining hands-on experience in software development and contributing to team projects.

EDUCATION

Patan Multiple Campus

Lalitpur, Nepal

Bachelor's in Computer Science Information Technology

Graduation Date: Apr 2023

PROJECT EXPERIENCE

Developer

Ncell Modular

- Developed scheduling module using Hangfire to trigger webhooks that automatically top up user balances on scheduled dates.
- Developed a threshold-based recharge module that publishes messages to a Kafka topic when the balance falls below a defined limit, using Hangfire to schedule and execute the process.

Banking Intranet System (GIBL)

- Optimized complex SQL queries, implemented caching for frequently accessed data and for third-party token generation to improve performance and reliability.
- Designed a database schema for resilient error message logging and developed a custom mail-capturing solution to intercept emails internally instead of relying on Microsoft Graph.
- Resolved Hangfire timeout and crashing issues, enhanced background job stability, and optimized cron expressions for improved scheduling performance.
- Developed comprehensive Unit and Integration tests for high-risk application services to enhance reliability and reduce production defects.

Access Control Management System

- Designed a system to define operations and their corresponding applications using workflow core.
- Implemented logic to dynamically create and execute workflow instances, including operation-level workflows and application task instances, based on the selected application and its associated operation.

Medical Inventory System

- Designed and implemented security mechanisms such as rate limiting, concurrent login restrictions, and Google reCAPTCHA integration to address vulnerabilities identified during VAPT assessments.
- Designed and implemented user interface components with Angular, resulting in improvement of user engagement scores and streamlining workflows for daily users.

Property Tour System

- Developed a microservices-based application that enables users to upload images and videos of their properties and create virtual property tours through the platform.

SKILLS & INTERESTS

Skills: C#, ABP Framework, ASP.NET, Entity Framework, PostgreSQL, SQL, JavaScript, TypeScript, HTML, CSS, Angular JS, Git, Docker, Jenkins, Kafka, Workflow Core

Interests: Logical Analyzing, Cognitive Thinking, Problem-solving, Teamwork, Growth Mindset
